

## Pacific Container Systems Pricing 2018

### Do You Know?

- *Where your container came from?*
- *What was in the container before you got it?*
- *Was the prior product toxic? A Pesticide? A herbicide? Dye?*
- *How was it washed?*
- *Was it washed with dirty water (as a batch)?*
- *Was it just rinsed with a garden hose?*
- *Were the accessories (Valve, Lid, Bung) washed separately?*
- *Was the valve torqued to spec?*
- *Was it leak tested?*
- *If it meets DOT standards for hazmat?*

Consider how these factors impact contamination or loss of your valuable products.

List Price as of January 1, 2018
